

Tracks

Puma and house cat tracks are easy to find in muddy areas or snow. Detective Stuart knows what to look for.

Be a Cat Tracker

If you have an outdoor cat, try following its tracks. Find out where it scratches and look for loose cat hair on bushes.

Compare: your cat's paw to a puma paw print. Hold your cat above the page and gently lay its paw on the paper.

Be a Prancing Puma

Pumas only walk on their toes. There is no heel mark in the track. See what kind of a dance you can create just moving on your toes and front pads of your feet.
